

RECREATEX COURSE MANAGEMENT TOOL

RECREATEX

ReCreateX (RCX) is the software platform that serves as a complete solution for leisure centres and services. ReCreateX supports an unlimited number of users and can be used in both small and large scale venues. ReCreateX has been designed using the most recent Microsoft technology and is based on an SQL database.

Syx Automations offers ReCreateX as a client server application and as a hosted application. Integration is a key factor: RCX can be linked to dozens of financial, administrative and technical applications.

RECREATEX COURSE MANAGEMENT TOOL

The ReCreateX Course management tool has been developed in close collaboration with the market in order to monitor students in a very simple and quick way, from the registration onto the waiting list up to the presentation of diplomas and certificates. During the courses, detailed information can be captured, for example attendance or the achieved results per skill and level.

Customers can register on site, if required at the counter, or through the Internet via the online registrations module.

INTERNET

Customers no longer have to queue onsite but can also enrol online onto a waiting list or lesson group. For all payments, ReCreateX integrates with an online payment provider of your choice.

Students results can be published online through a link on your own Website. The results are immediately visible and will show in which fields the student has obtained high scores and in which areas efforts will still have to be made.

Parents, family or the students themselves can login using a personal user name and password. This way their progress can be tracked online.

HIGHLIGHTS

- Manage waiting lists and lesson groups
 - Manage lesson scoring
 - Renew course membership
 - Transfer students to another lesson group
 - Print diplomas
 - Ability to identify students by photograph
 - Keep track of attendance
 - Possibility to add extra information per student
 - Possibility to indicate priority during registration through a waiting list
 - Graphical calendar overview of lessons in Outlook style
 - Possibility to use preferential lesson groups
 - Integration with access control. Thanks to visitor registration, a green or red icon is visualised. In this way, it is possible to check if the student was present or not on the selected lesson date.
 - Work planning of instructors, linked to lessons
 - Consult transfer history
 - Consult student follow-up history: follow up all transactions of 1 or several instructors within a certain period
 - All sorts of reports are available: list of participants per lesson group, list of students present, attendance, list of achievements per student, follow-up of students per level, list of students per level, etc.
- The module has been developed according to Dutch government guidelines such as the NPZ-NRZ platform, but can also be applied for all other desired course methods.

PDA & TABLET

A perfect addition is the PDA or tablet. With a PDA or tablet, the swimming instructor can enter pupils' scores on the side of the pool. Because everything is done in real time, through an integrated wireless network, the administrative tasks of the instructors are reduced to a minimum. The data in the central database is updated automatically in real time so that the instructor no longer has to enter the scores afterwards.

The PDA can also be used to scan membership and lesson cards and as an extra mobile point of sale for taking orders in your catering facilities.

ABOUT SYX AUTOMATIONS

Syx Automations, with headquarters in Ypres (BE) and offices in Nijkerk (NL) and London (UK) is active in the field of software and automation solutions for the leisure market.

For 25 years already, Syx Automations has been a valued ICT company with over 70 professional employees. Innovative software development by the subsidiary SyDelSoft® and continuous customer awareness lead to progressive solutions aimed at the leisure market. Syx Automations focuses on total projects based on the ReCreateX software platform, developed in-house for public recreation services, swimming pools, museums, theatres and recreation parks. Other core competences of SA include IT services, access control systems and our own building management system.
